Virtual Host Log

Use Server's Log	<input checked="" type="checkbox"/>	Yes
File Name	<input checked="" type="checkbox"/>	\$VH_ROOT/logs/error.log
Log Level	<input checked="" type="checkbox"/>	DEBUG
Rolling Size (bytes)	<input checked="" type="checkbox"/>	10M
Keep Days	<input checked="" type="checkbox"/>	Not Set
Compress Archive	<input checked="" type="checkbox"/>	Not Set

Access Log

Log Control	File Name	Log Format	Rolling Size (bytes)	Actions
Own Log File	\$VH_ROOT/logs/access.log	Not Set	10M	 

- When required, you can disable access logging for this virtual host to save on disk I/O.
- Log file path can be an absolute path or a relative path to \$SERVER_ROOT, \$VH_ROOT.
- A new log file will be created if current log file exceeds the rolling size. File size is in bytes and can be in multiple input formats: 10240, 10K or 1M.
